INTRODUCTION

We would like to take this opportunity to thank you for selecting Elite Training and Consultancy for the delivery of your training. We believe that we have created a training programme which, if you fully participate, will be a beneficial learning experience and will give you every chance of success in the exams you will be completing.

We believe we will provide you with thorough preparation for the exam and wish you every success in your attempt to achieve the certification.

Your learning will consist of three parts:

1. Pre-Course Work
In this document you will find a requirement for you to fulfil prior to attending the training course. Completion of this work is essential before attending the course as it will provide you with the best possible platform upon which you can go on to benefit from the training and be successful in passing the exams.

2. Course work
The course work is exacting, and you need to be focused on the course and its requirements. We would recommend that you:

1. Immerse yourself in the work each day.
2. Keep engaged and participate in discussion and activities to the full.
3. Do the evening work and share it with the instructor.
4. Be prompt – arrive early and try to distance yourself from your work commitments as much as possible.
5. Get to know your course documentation.

3. Evening Work
The work your instructor will ask you to complete in the evening is an essential part of the development of your knowledge and preparation for your exams. We suggest you cancel any social commitments you have for the week so that you can focus on the course and your exam preparation. You should allow two to three hours per night for the evening work.

PRE-COURSE WORK

This section provides guidance on the activities you are expected to complete before attending the course. Please see below for details on the pre-course documentation and pre-course work.

PRE-COURSE DOCUMENTATION

The pre-course documentation consists of the following documents. Please see page 5 for information on how you will receive your pre-course and course materials.

- Pre-Course Guidance & Requirements document
- Official PRINCE2 Manual
- PRINCE2 Foundation & Practitioner Syllabus

PRE-COURSE WORK

You should:

1. Read and follow the pre-course guidance provided.
2. Ensure you read through the manual and the appendices at least once before attending the course. Please read Chapters 1-7, 13 and 15 at the absolute minimum.
3. Review the exam syllabus documents.

We ask that you work through the above pre-course work before attending the course. This will provide you with a basic understanding of the key concepts of project management which will be foundational to your understanding going forward.

These activities will take approximately 15 hours. The more work you complete in preparation for the course, the more beneficial the training will be to you.

COURSE MATERIALS

We will provide all the course materials and documentation that you will need for your training in advance of the course.
